After a Long Day on the Water,
Ease into Port

www.ez-dock.com  1-800-654-8168
Can Your Dock Do This?

Keeping your boat high and dry has never been so easy! The new EZ BoatPort™ from EZ Dock is a simple drive-on, drive-off method of docking for boats in a wide range of sizes up to 5,000 pounds. Removable and changeable bunks can accommodate boats with a deadrise angle from zero to 21 degrees, making this the perfect choice for many skiffs, runabouts, fishing boats and jet boats. The new EZ BoatPort is also available with new Side Extensions for additional walk-around room and access to the sides of your boat for cleaning, maintenance and covering.

EZ BoatPort Advantages

✧ For small or large boats up to 5,000 pounds
✧ Easy docking and launching
✧ Ample stability and walk-around access to the boat
✧ Configurations to fit multiple boat shapes and sizes
✧ Eliminates issues caused by wet storage
✧ Self-floating and moves with changing water levels
✧ Works with existing floating or fixed docks
✧ Ability to use in as little as two feet of water
✧ Drive-on, drive-off loading without the need for winching, cranking or hoisting

Drive-On, Drive-Off

Simply idle up, center your boat on the roller, add slight power and roll up to the front of the EZ BoatPort. You and your passengers will enjoy room on three sides for loading and unloading the boat, or washing it down and putting on the cover. Backing off is easy, too. Just turn the motor on, lower the motor into the water, and gently back off.

The EZ BoatPort is manufactured from long lasting, UV stabilized polyethylene, and includes two replaceable entry wear plates, and two self-centering keel rollers for dependable porting. Optional accessories and packages are available to configure the EZ BoatPort to your needs.

Drive-On

- Idle Up & Center
- Power On
- Roll To Front
- Turn Motor Off

Drive-Off

- Turn Motor On
- Lower Motor Into Water
- Back Off

For larger boats requiring the use of the Air-Assist pump, a few additional steps will be required to engage and disengage the pump unit.
Customize With Ease

The EZ BoatPort’s modular design allows for numerous configurations and additional features to fit a wide variety of boat shapes and sizes. For larger boats with the need for additional flotation and walking space, the EZ BoatPort is also available with Side Extensions and/or Float Tank with Air-Assist pump.

Add-On Features Include

- Customizable skid bunks to fit a variety of hull shapes & sizes
- Up to three additional keel rollers for longer boats
- Supplemental flotation kit for added buoyancy
- Optional side extensions for additional walk-around room
- Flip-up front cleat to secure the boat to the port
- High-quality winch system

Now available with Float Tank and Air-Assist Pump for lifting capacity of up to 5,000 lbs. 4 options currently available:

- Manual Controlled 110v AC powered pump unit
- Battery powered with solar charging system and manual controls (12v DC deep cycle battery not included)
- Remote Control 110v AC pump unit
- Manual 220v AC European model (includes both European & UK model plugs)
**Package Options**

**Bunk Options**
- L - Long Bunk
- S - Short Bunk

**Pump Unit Options**
- M - Manual Pump Unit
- S - Solar Pump Unit
- R - Remote Pump Unit
- E - European Pump Unit
